* These profiles and media recommendations are provided "AS IS" with no guarantees, warranty or support, expressed or implied.

1. First, download the profiles and copy them to these folders:
 Windows: *Program Files\Common Files\Adobe\Color\Profiles.*
 Mac OS 9: *System Folder: Application Support/Adobe/Color/Profiles.*
 Mac OS X: */Library/Application Support/Adobe/Color/Profiles.*
2. Load the 3rd party media into the printer (see the picking recommendations under section 5). Remember to calibrate it using the media type and print mode that you will select in the driver (see also the media type and printmode recommended under section 5).
3. Open the **Adobe Photoshop** application and open your image.
4. Print the image, configure Adobe Photoshop **Print with Preview...** settings, **File menu > Print with Preview...**:
 - a) Select **Show More Options**.
 - b) Select the **Color Management** tab and change the settings to the following:
 - i) **Source Space:** Document.
 - ii) **Print Space Profile:** Select the ICC profile you have just downloaded and installed in your computer.
 - iii) **Intent:** Perceptual (RGB images) or Relative Colorimetric (CMYK images).

- c) Select **Print...**
 - d) **Printer:** Select the printer (ex. HP designjet 130).
5. The location of the settings for the HP Designjet 30/90/130 driver depends on which operating system you have. Use these settings:
 - a) Select the next **Media Type** and **Print Quality** depending on the 3rd party media loaded in your printer, see next list.

See also the recommended **Picking options**.
